1. Introduction

The Department of Census and Statistics (DCS) has released the National Consumer Price Index (NCPI) and Inflation for the month of July 2017.

The NCPI has been releasing monthly from October 2015 with a time lag of 21 days. The NCPI has weights based on consumer spending in 2012/13 Household Income and Expenditure Survey (HIES), and reflects new methods consistent with international best practices. Also the DCS has rebased the Colombo Consumer Price Index (CCPI) with the base period of 2013 from January 2017, covering the urban areas of Colombo district.

To reflect international recommendations and best practices, the index weights refer to each item's share in the total consumption expenditures of all Sri Lankan households. The provincial weights refer to the consumption expenditures within the province in proportion to the expenditures in the whole country. The index weights are based on expenditure data derived from the Household Income and Expenditure Survey (HIES) conducted in 2012/13. The 2012/13 HIES included all types of consumption expenditures by households, and was broadly representative of all households in the country. The year 2013 is considered as the base year for NCPI.

The national consumer basket includes 407 items which represent the consumption expenditure of all households in Sri Lanka. For the compilation of NCPI, three price quotations are collected for each of the items in each district town. Prices for some items are collected weekly (e.g. fresh fish, rice, vegetables, fruits, coconut etc.), while prices for other items are collected twice a week (e.g. dried fish, spices, cereals, etc.), monthly (e.g. readymade garments, washing soap/washing powder etc.) and quarterly (e.g. furniture, laundry charges etc.). The frequency of price collection is determined by on an average how frequently price changes are taken place.

2. Month on Month (M on M) change of NCPI:

The NCPI for all items for the month of July 2017 was 122.4. A decrease of 1.0 index points or a percentage of 0.8 was noted in July 2017 compared to that of June 2017 for which the index was 123.4. This decrease represents decrease in expenditure value of Rs. 332.02 in the "Market Basket".

Monthly changes of index number, expenditure values and percentage change of index number are given in the following table (Table 01).

Table 01: Monthly Changes by Main Groups of Market Basket

*Note: There are 12 main groups of the market basket. Monthly significant changes were noted only in seven main groups in July 2017,

2.1. Contribution to M on M Changes:

Contributions to the decrease in NCPI on month on month basis (July 2017 compared to June 2017) are given in Table 02. The decrease in the index point by 0.84% was due to the expenditure value decrease of food items by 0.90% and increase of non-food items by 0.06%.

2.1.1. Contribution of Food items: - 0.90%

As shown in Table 02, the decreases in expenditure value in index were reported for Coconuts (0.28%), Vegetables (0.26%), Fresh fish (0.18%), Green chilies (0.09%), Garlic (0.08%), Red onions (0.08%), Coconut oil (0.02%), Big onions (0.02%) and Mysore dhal (0.01%). However, increases in expenditure value in index were reported for Banana (0.06%), Rice (0.04%), Eggs (0.02%), Sprats(dry) (0.02%) and Tea (0.01%).

2.1.2. Contribution of Non food items: 0.06%

The increases in expenditure value in index were reported for non food commodity groups of 'Transport' (0.08%), 'Miscellaneous Goods and Services' (0.03%), 'Alcoholic beverages, Tobacco and Narcotics' (0.02%), 'Furnishing, Household equipment and Routine household maintenance' (0.01%) and 'Clothing and Footwear' (0.01%). Further, the group of 'Restaurant and Hotels' recorded very slight expenditure value increase compared to the previous month. However, expenditure value decrease was observed for group of 'Health' (0.08%).The expenditure value of 'Housing, Water, Electricity, Gas and Other fuels', 'Communication', 'Recreation & Culture' and 'Education' groups remained unchanged during the month.

The expenditure value increase of 'Transport' group was due to increase in bus fare with effect from 01st of July 2017 and the expenditure value decrease of 'Health' group was due to the reduction of prices of certain laboratory tests.

3. Inflation

The NCPI is a macroeconomic indicator compiled to measure inflation which is defined as a sustained increase in the general level of prices for goods and services and it is measured as an annual percentage increase by NCPI. Inflation can be measured in two ways. One measure is Year on Year base or Point to Point inflation (The percentage change in the current month CPI over same month CPI of last year). The other measure is Moving Average Inflation (The percentage difference between the average Price Indices of last 12 months & the average Price Indices of previous 12 months).

**Note: The Year on Year inflation reported for July 2017 in Table 03 does not tally with the Year on Year inflation reported in Table 04 due to rounding off.*

3.1. Year on Year (Y on Y) Inflation

The overall rate of inflation as measured by NCPI on Y on Y basis is 6.3% in July 2017. Also the inflation remained at 6.3% in July, unchanged from June 2017 (Table 03). Y on Y inflation of food group reported for the month of July 2017 was 8.2% while that for non food group was 4.7%.

3.1.1. Contribution to Y on Y inflation:

On year on year basis, contribution of food commodities to inflation was 3.66 percent in July 2017 compared to July 2016 (Table 04).

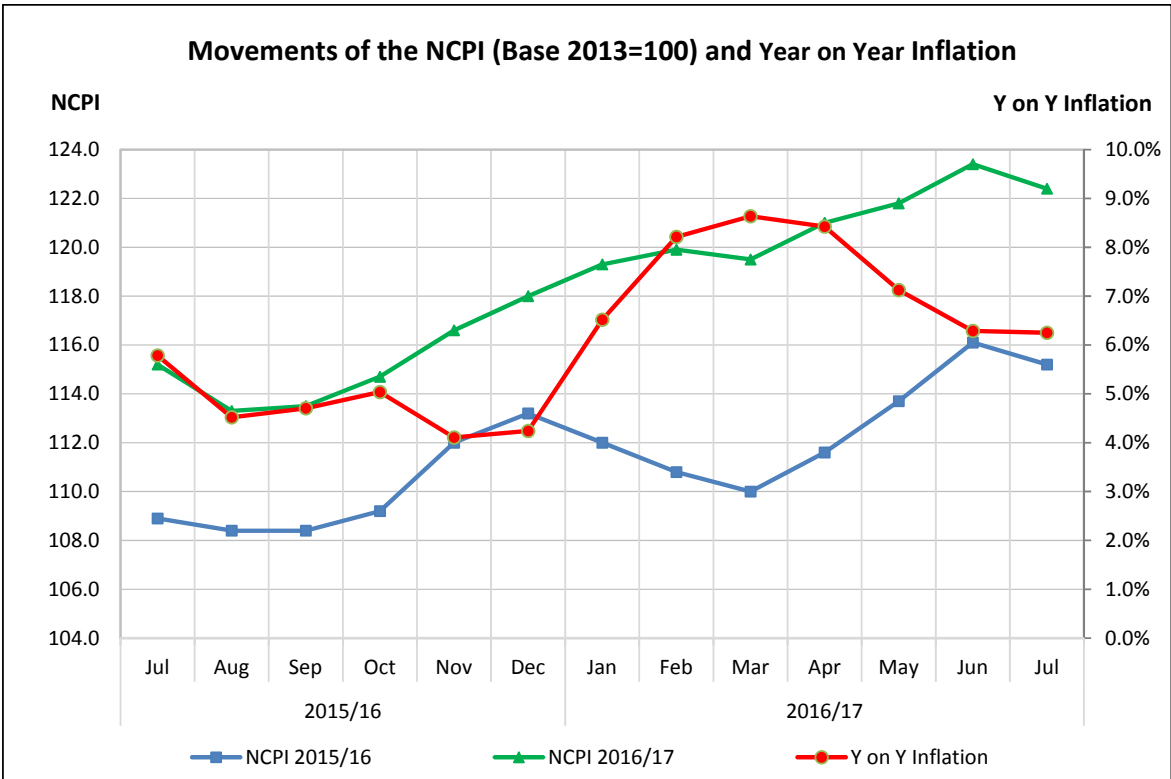

Contribution of non food items was 2.56 percent. This was mainly due to expenditure value increases in 'Transport' (0.53%), 'Miscellaneous Goods and Services' (0.52%), 'Alcoholic beverages, Tobacco and Narcotics' (0.46%), 'Furnishing Household equipment and Routine household maintenance' (0.20%), 'Health' (0.18%), 'Communication' (0.17%), 'Housing, Water, Electricity, Gas and Other fuels' (0.15%), 'Education' (0.12%) and 'Clothing and Footwear' (0.11%).
